

Intro

welcome to

Klay Matcha 2026

Matcha is a Vanilla+ datapack that provides alternatives to mob farming.

Address: `mc.hatspace.net`

Rules

1. No trolling.
2. Adults only.
3. Use content warnings!
e.g., you may post NSFW art inside a building, but only if it is clearly labeled on the outside.
4. No auto-sorting other people's items.

Mods (optional)

Because this is a datapack, all mods are optional! I recommend these:

- Ears: adds additional layers to the player skin for ears and a tail and other furry stuff.
- Signed Paintings: allows you to post images on signs and view them. I'll be using this wiki as my image host :3
- Jade: mod that tells you "what am I looking at?"
- Mouse Wheelie: auto-sorting go brr (but see rule 4)

This Wiki

Post anything you want related to this minecraft world on the [board](#)!

Feel free to leave any additional notes on this wiki! We are not wikipedia, there is no such thing as quality control, so chost as much as you wanna :P
